PROFESSIONAL SUMMARY

Independent restaurant technology consultant specializing in SaaS implementation, client onboarding, and training for inventory management platforms including MarketMan and xtraChef. Experienced in configuring end-to-end restaurant tech stacks — POS integration (Toast, Square), inventory setup, recipe costing, and accounting sync (QuickBooks Online) — with a consistent 4–6 week delivery track record. Recognized for reducing onboarding time, improving product adoption, managing churn risk, and building automation tools that reduce repetitive admin work. Available for independent consulting engagements, contract onboarding roles, and full-time positions with restaurant technology companies.

CONSULTING SERVICES

Available for the following engagements on a consulting or contract basis:

- **Restaurant Tech Implementation** — End-to-end setup of MarketMan, xtraChef, and related platforms: POS integration, inventory configuration, recipe costing, and accounting sync.
- **SaaS Onboarding & Training** — Private and group training programs, session management, recap documentation, and ongoing client support until full product adoption.
- **Troubleshooting & Technical Support** — Multi-system sync issue resolution across POS, inventory, and accounting platforms; coordinating with platform support on behalf of the client.
- **Process & Automation Consulting** — Custom tracking systems, AI-powered tools (Gemini Gems), and email workflow automation (Text Blaze) to reduce repetitive admin work.

EXPERIENCE
